Frequently Asked

Lead Times

We know how important it is to keep your projects on schedule. That's why DIS-TRAN Steel works with each of our customers to provide accurate lead times for their individual project needs. Reach out to our team to discuss standard lead times and any special project needs.

Pricing

We take a comprehensive approach to pricing our custom-designed steel structures. By considering factors such as market, shop capacity, and structure complexity, we can create a customized proposal that meets your specific project requirements and budget.

Capacity

With multiple facilities across the country, we have the capacity to meet your projects needs efficiently and reliably.

OUR MISSION

In order to be an industry leader, you need reliable suppliers that will keep your project on track. At DIS-TRAN Steel, we believe our customers deserve a dependable partner they can trust. Since 1965, we've been building quality high voltage substation and transmission steel structures for utilities across the United States while consistently maintaining our standards: simple values backed by honest relationships with our customers.

OUR GOAL

Our customers are like a second family, so we're by your side every step of the way. With over 50 years of experience manufacturing utility structures, multiple locations across the country, quick quoting, and high responsiveness, DIS-TRAN Steel provides the product integrity your project needs and deserves.
